OUR HUB COVERAGE

Our China sea import service is one RIF Group's largest service offerings, with the majority of our client base choosing to use this service on a regular basis.

Our unique approach in the LCL market has allowed us to offer something different to our competitors, with a personalised and tailored touch.

The services we offer accommodate for all ports and outports in China. Although most of our volume is destined for the UK, our growth in this area to the Netherlands and Australia are a clear indication of our continued results.

We take great pride in our customer care and shipment handling, offering a dedicated account handler approach. This dedicated account handler will look after all elements of your booking from arranging the shipment, to performing the customs clearance and setting up the delivery. Our results are measured with our customers' satisfaction and retention results.

HOW IT WORKS - by LCL

- » EFC allows us to offer a longer validity of LCL shipping rates, providing more control over our forecasting and procurement, ultimately issuing our clients with market stability.
- » The service runs through our local offices and warehouses in China, connecting with our UK offices and warehouses, providing us with greater control of every shipment throughout its journey.
- » Our online platforms used throughout RIF Group's companies provide end to end visibility enabling us to track consignments throughout their journey across the globe.

THE PROCESS

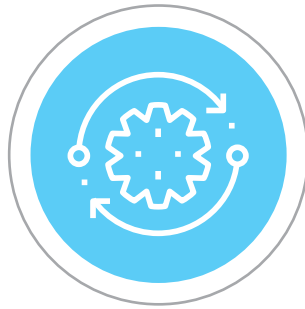

- » Once we receive a booking, our local team will contact your factory. This can be setup as a routing order to save time and communication, or instructed per shipment, depending on your requirements.
- » Our team will revert with a booking confirmation once the booking is confirmed (this will contain our sailing schedule and confirmed booking details).
- » When the vessel departs from China, our team will keep you updated and will start the UK formalities. This will include requesting clearance information and confirming delivery instructions.
- » When the container has been landed at Felixstowe port, the container will be transferred to our local warehouse where priority slots are allocated to our containers, and unloading activities will be completed.
- » Customs clearance for each shipment will be performed once unloaded from our container - subject to having the required customs clearance information in place.
- Once customs clearance is complete, each shipment will be dispatched for delivery, with completion targeted within 48-72 hours depending on the destination region.

RIF SEA FREIGHT SERVICE

THE BENEFITS

End to end control
and visibility

Flexible Solutions
to meet our clients'
needs

Stable rates,
budget ahead

Express
direct service

- » Weekly guaranteed schedules
- » Longer market rate validity
- » Reduced port cut-off times in China
- » Reduced devanning and handling activities
- » 48/72 hour delivery after customs clearance / devanning
- » IT Technology (same systems being used at origin and destination), providing greater visibility of your shipment
